

HOW DO WE COMPARE?? The following are school wide results compared to a range of national indicators. In providing these results it should be remembered that they are derived from NCEA assessment using Unit Standards (US - examined internally only) and Achievement Standards (AS - examined internally and externally). The **US : AS proportion** for NBHS in 2008 was 27.2% US (The national average is 37.6%) and 72.8% AS. The school believes that the rigor of the Achievement Standards (particularly those assessed externally in exams) is an important aspect of assessment.
